DILATING THE EYE

Many diseases such as diabetes, hypertension, glaucoma and tumors of the eye as well as tears and holes of the retina can be detected with dilation. A dilation requires placing drops in the eyes to enlarge the pupil which allows a thorough examination of the inside of the eye for these and other problems. The side effects are blurred near vision and light sensitivity for about 3 - 4 hours. The Dr. may recommend that a dilation be performed. There is no additional charge for this procedure.

Professional fees are due upon completion of services. although we do bill some insurances, please be advised that payment is still your responsibility. For your convenience we accept Visa and Mastercard. NOTE: ALL RETURNED CHECKS ARE SUBJECT TO A $15.00 CHARGE.

ASSIGNMENT AND RELEASE:

I HEREBY AUTHORIZE THE PHYSICIAN TO RELEASE ANY INFORMATION REQUIRED TO PROCESS THIS CLAIM. I ALSO AUTHORIZE MY INSURANCE BENEFITS TO BE PAID DIRECTLY TO THE PHYSICIAN, AND I UNDERSTAND I AM RESPONSIBLE FOR NON-COVERED SERVICES.
